Priority Category:	N/A

Description: The OneSD project provides for the replacement of many legacy software systems currently in use by City departments with the business center of the Office of the Chief Financial Officer (CFO) and Business and Support Services. The System will replace the following major systems: AMRIS (General Ledger), ALVA (Financial Reporting), APIS (Accounts Payable), ARIS (Accounts Receivable), FMIS (Budgeting and Financial Management), FAMIS (Fixed Asset Management), OPIS (Purchasing), CAPPS (Payroll), and PATS (Applicant Tracking). Additionally, this integrated application will be used by all City departments for day-to-day business operations and human resource needs and is expected to support the City's information technology (IT) needs for the next 15 years.

Justification: Recommendations contained in the Kroll Report stated that due to their antiquated state, the City's major software systems require updating. The applications that support the departments under the Office of the Chief Financial Officer (CFO) and Business and Support Services no longer meet the requirements for responsible financial management, efficient human resources management, and IT operational efficiency.

Operating Budget Impact: The expenses to support ongoing operating of the OneSD project are already included in the City's budget. Debt service payments are currently budgeted in the Enterprise Resource Planning (ERP) Department for Fiscal Year 2011.

Relationship to General and Community Plans: This project is in conformance with the City's General Plan.

Schedule: The implementation of the OneSD project was divided into phases and completed on the following dates: Financial and Logistics (purchasing and contracting) applications July 1, 2009; Human Capital Management (HCM), which includes human resources/personnel, benefits and payroll functions December 21, 2009; Public Budget Formulation (PBF) November 1, 2009; and Accounts Receivable March 1, 2010.

Summary of Project Changes: The OneSD project is complete and closure is expected by the end of the fiscal year. Debt payments will be made by the Enterprise Resource Planning (ERP) Department.
